

Safaricom Telecommunication Ethiopia EKYC processes Training Material Updated May 02, 2024

New Customer E-KYC Registration Process

Updated May 02, 2024

Requirements of ID to Purchase SIM Cards

For Ethiopian Citizens

- Residence identification card
- Driving license
- Passport
- Police or Military ID
- University Student ID (both public and private)
- High school student ID (both public & private) must be ≥ 18 years old
- Government or private employment ID
- Taxpayer ID

Foreign Nationals of Ethiopian

Origin(Diaspora)

- Passport, or
- Ethiopian origin card

Non-Ethiopians (Foreigners)

- Passport
- Resident permit
- Diplomatic identity card (if the customer is a diplomat)
- Refugee ID

Note:

() We are aware that some expired IDs have not been renewed by local governments. Ethiopian Communication Authority (i.e., telecom regulator) agreed to accept expired Kebele IDs for the time being.*

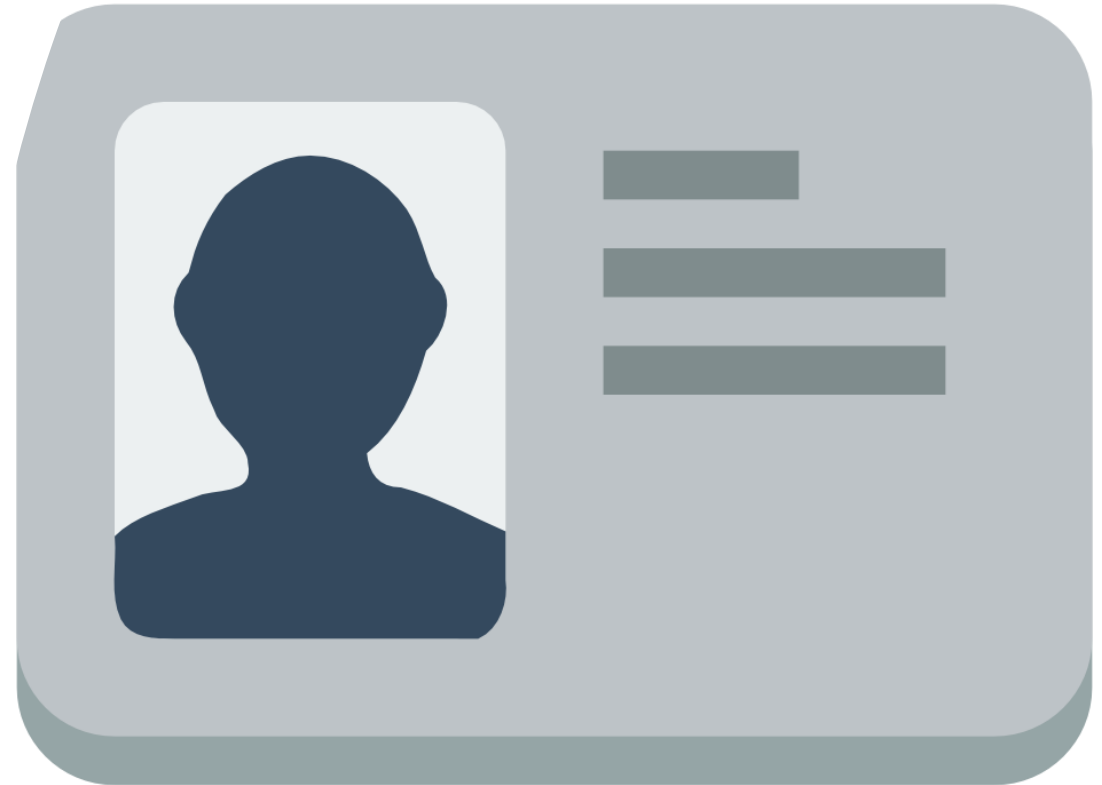

() A minor to be registered needs to come with an adult (parent/legal guardian) who already has a Safaricom sim card. And birth certificate*

What is valid ID

Valid ID means

- Must have Nationality information on ID
- Must have Acceptable ID by ECA
- ID must not be damaged
- Must have Quality Photo on ID
- Must have Full name on ID
- Must have Stamp on ID by authorized issuer
- Must have date of issue
- Must have date of birth
- Must have ≥ 18 years old

Validate the Request

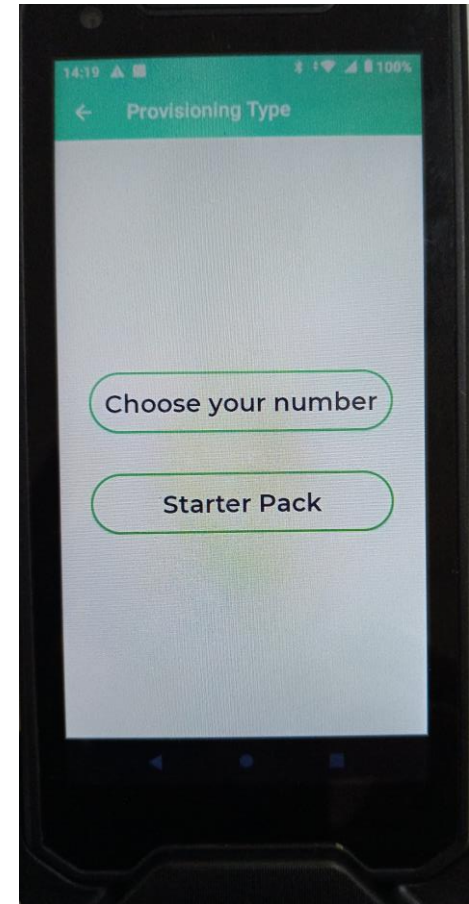

As SIM Selling agent always make sure your E-KYC device is on the latest version.

Start the customer registration process by validating the service request by checking if the customer has:

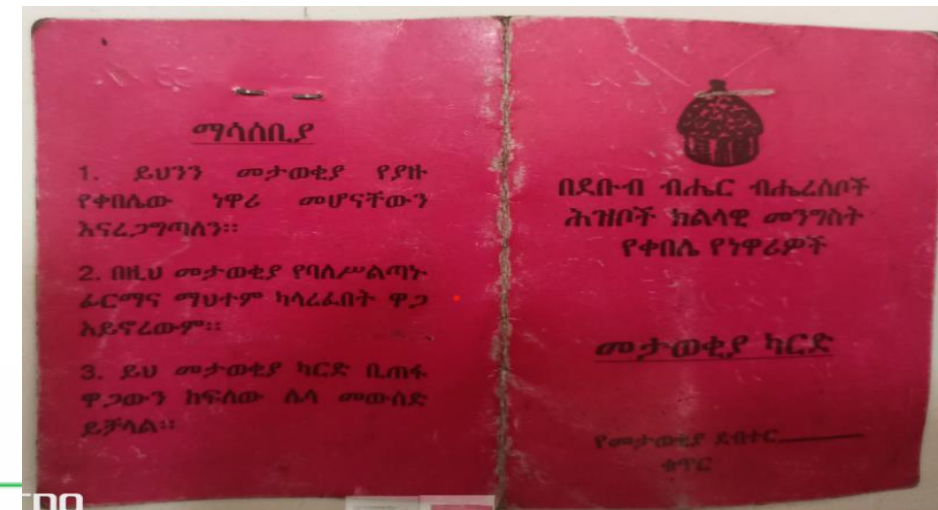

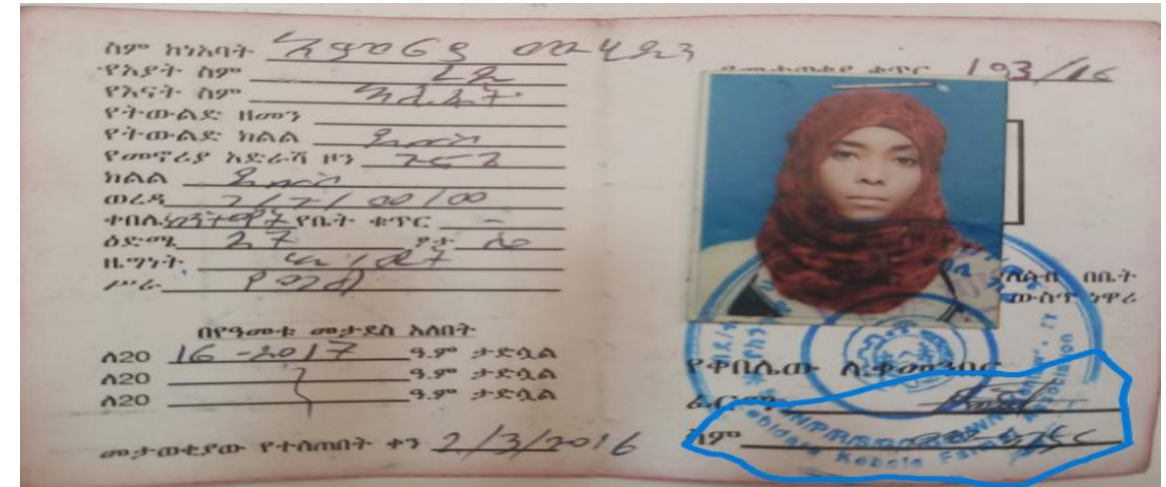

- Only the approved ID by Ethiopian Communication Authority as mentioned on previous page
- Any approved ID that has not expired except for Kebele ID. Even a day before expiry is valid for registration. In some regions renewal is done by stamp along with the year.
- Should have full name & quality photo on ID and capture live photo of the customer
- Should have stamp that resembles
- Proxy registration is not allowed
- The customer Infront of you & the ID should be the same.
- The age must be $> / = 18$ years old

Note: If any of the above points are not true, the SSO should inform the reason to customer & decline the request

Once again confirm with the customer if all the required documents are available before you start registration

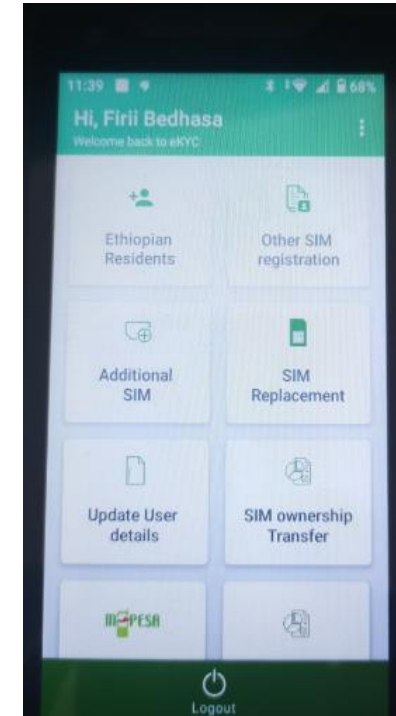

What to Look out during validation

1. Select the Onboarding Type

Selects the onboarding type from the drop-down options

- Ethiopian Resident Onboarding
- Other Sim Registration
 - *Diplomat Onboarding*
 - *Minor Onboarding*
 - *Visitor Onboarding*
- Add SIM (Existing Customer Onboarding)
- SIM replacement
- Sim ownership transfer
- M-PESA Activation

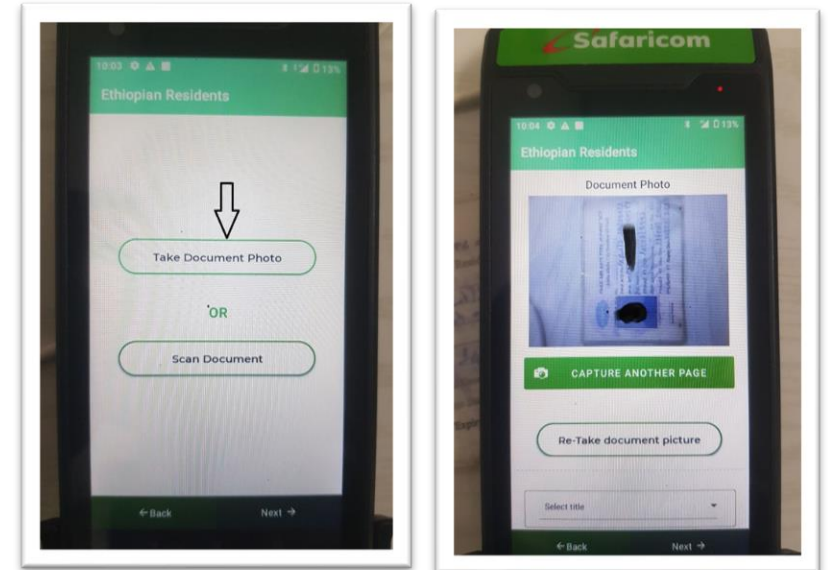

Note: Documents you will be asked will be dependent of the onboarding type you select here

Please make sure if the customer is an existing customer or new customer before you proceed to the process

2. Take photo of the document

- SIM Selling Agent takes a picture of the document Kebele ID, Passport, Driving License ... as stated by Ethiopian Communication Authority.
- If the quality of the picture is not good, you can take another picture by clicking on “Retake Picture” & if the document has additional pages you can click on “Capture Another Page”
- Make sure the ID front and back side is captured well
- All the photo taken should not be blurry & should not have a light reflection as it will result rejection.
- The photo must be captured passport size

Note: For minor registration, the guardian/parent needs to be registered as a subscriber first. & should not reflect light as it will be one factor for rejection.

3. Fill the demographic details

After scanning the document ID, the SSA fills the demographic details of the customer's mandatory fields

- Fill name as seen on ID (need to have care for spellings)
- Nationality
- Issuing state: The regional government/ City Administration
- Date of birth as seen on ID. If ID has only the year of birth, ask the customer and If they don't know fill in "Meskerem 1" on date
- Gender
- Date of issue and Expired date filled properly
- Language: Ask the customer their preferred language. This is a language they will use while using the services with Safaricom.

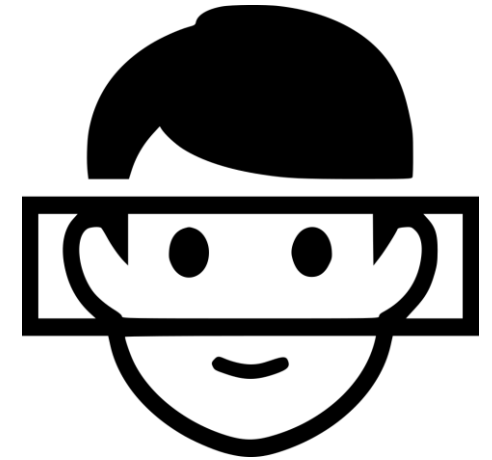

A screenshot of a mobile application interface for Safaricom. The app is titled "Ethiopian Residents". At the top, there is a green header with the Safaricom logo. Below the header, there is a status bar showing the time as 10:05 and battery level at 013%. The main content area contains a form with several fields: a "Re-Take document picture" button with a left-pointing arrow, a "Select title" dropdown menu, "First name" and "Middle name" input fields, a "Last name" input field, a "Select Document Type" dropdown menu, an "ID No/Passport No." input field, and a "Select Nationality" dropdown menu. At the bottom of the form, there are "Back" and "Next" navigation buttons.

Note: Email & phone number is good to have but if the customer doesn't have it, you can escape it. It is not mandatory
Make sure you capture everything correctly as seen on the ID.

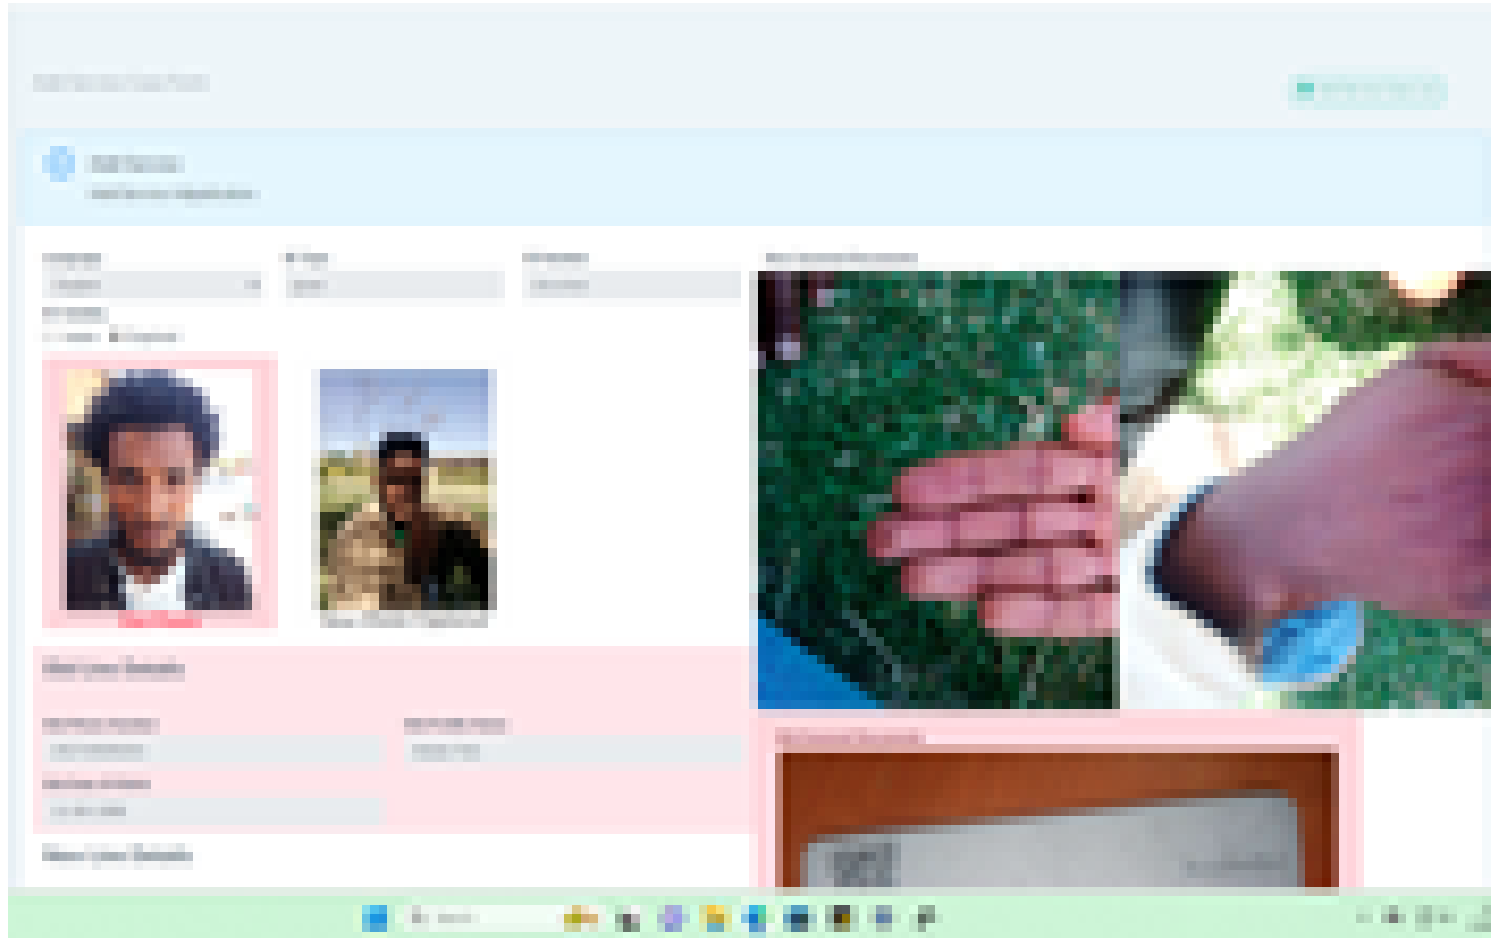

4. Capture Customer's Photo

SIM Selling Agent should capture photo of the customer using the e-KYC device at this point

- Customer should face the camera directly, full size photo is not acceptable, should capture only full face of the customer from chest upwards.
- Ensure there is adequate light in the room, should be well lit. It should also not have too much light at the back of the customer.
- The camera Lense on EKYC device should be clean otherwise it might result blurry picture.
- Customer should maintain a neutral facial expression just like taking passport size photo.
- Picture should not be broken & taken from side.

Note: What you see on the screen will appear at back office as well. So, make sure the picture is well taken. As it will be a factor for rejection

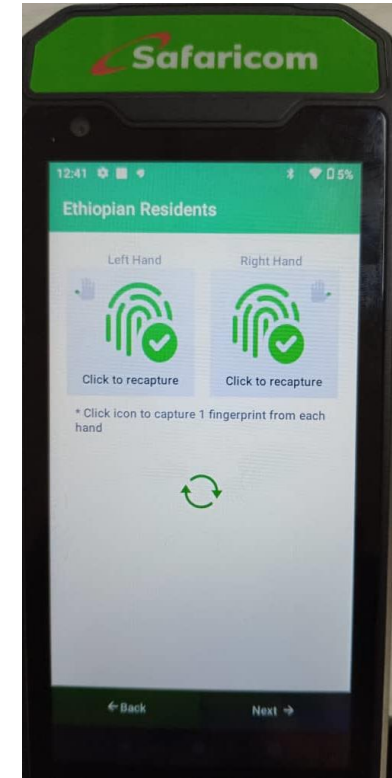

5. Capture customer's fingerprints

SIM Selling Agent captures 2 fingerprints of customer for both right and left hands

The fingerprints to be scanned are:

- 2 Thumbs (Right & Left)
- Needs to be placed properly on the scanner (might cause irregular registration)
- If it is adding services take one of the two thumbs and taken live photo and ID

Upon successful scan for each finger, the matching finger displayed on SSA' scanner turns from red to green.

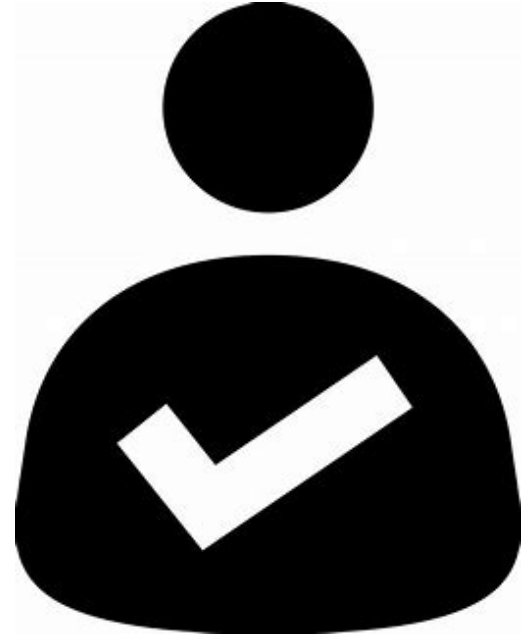

Note: Customer who are not able to give figure print for different reasons can visit Safaricom shops with care desk.

6. Confirm & submit the customer details

SSO confirms and submits the scanned & captured customer details to be authenticated by the E-KYC system

- If the customer details are already registered, the E-KYC system Pops up a notification.
- The SSA proceeds to handle the customer request as per pre-defined “SIM Card Sales Process”.

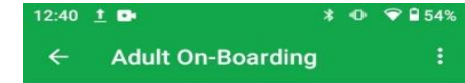

Note: *If customer's fingerprint/ name is having already been registered before knowingly or unknowingly. The eKYC system will bring the registered numbers. You can try registering through existing customer if this doesn't work call contact center.*

7. Starter Pack/Dynamic Number

When customers details submitted are successfully authenticated and customer has not been enrolled yet, the agent can select one onboarding option:

- **Choose Your Number:** You select the number that the customer choose & scan the bar code it will automatically fill ICCID, MSISDN, ICCIN Number, IMSI number and confirm. Manage customer's expectation when choosing number as some numbers can be gold or platinum.
- **Starter Pack:** will be communicated when active.

Scan barcode of the sim pack

Starter Pack

Dynamic Number

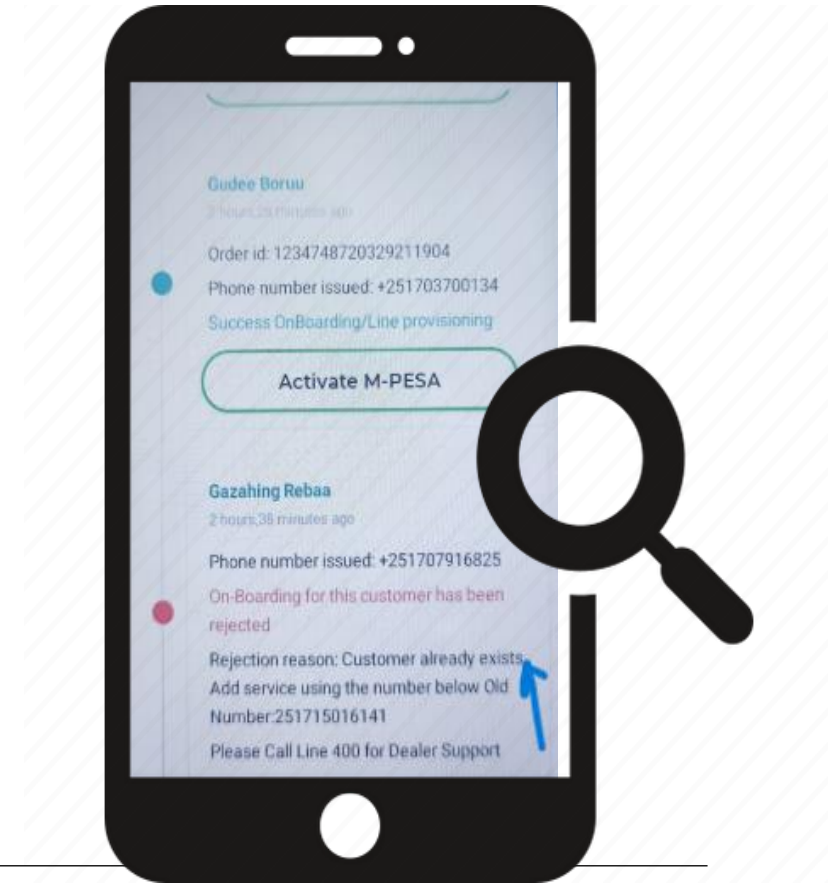

Note: If the customer chooses choose your number The agent fill in “starts with” 07 and “Ends with” their choice of number two-four digits for optimal experience but can be searched up to six digits.

8. Approved Registration

Agent should always look at the registration status after completing from his/her side.

- Processing,
- Under adjudication,
- Successful onboarding/ line provisioning,
- Rejected

Note: The customer shouldn't leave agent's shop without end-to-end registration. If approval takes long agent should call Contact Center on 400 for support. Activate the sim by inserting it into the devices.

Rejection Reasons

Rejection Reasons & their Definitions

Notification	Meaning
Expired ID	ID is expired, not valid and acceptable for registration
Underage	age < 18 years
Incorrect Nationality	wrong nationality information is captured, Nationality information on the ID & registration does not match
Suspicious - ID	Fake ID, Copy ID
Suspicious - Live Photo	Photo has been used multiple times, more than 5 times, Live photo mismatch with photo on ID
Suspicious - Subscription fraud	irregular registration, fraudulent registration
Invalid ID Type	Unacceptable ID's which are NOT on the directive and are NOT permitted by ECA
Damaged ID	ID difficult to read or difficult to be used to verify the E-KYC registration
Scanned Document Blurry	ID picture is blurry/ not captured well
Scanned ID Back Blurry	Back Side ID picture is blurry/ not captured well
ID Backside Not Received	Only front side ID is captured, date of issuance/exiry may exist on the back side of the ID
ID Partially Scanned	ID not captured well/fully
Poor Quality - Photo on ID	blurry , poor quality, difficult to validate with live photo
Mismatch On Scanned and Live Photo	Photo on the ID & Live photo captured doesn't match
Poor Quality - Live Photo	blurry live photo, poor quality, difficult to validate with photo on ID

Rejection Reasons with Scenarios

No	Scenario	Decision	Rejection Reason	Remark
1	Id with only first name	• Reject	• Full name on the ID not completed	
2	Id with no full name	• Reject		
3	If full name on ID is covered	• Reject	• Mandatory Field hidden	
4	If grandfather name on ID is covered or hidden and what SSO captured is not clear	Use N/A for grandfather and Accept		
5	If SSO captured customer full name incorrectly. E.g selemon, Ababa, kadir	• Edit full name as per the ID and Accept		Report SSOs
6	If grandfather name on ID is covered or hidden and what SSO captured make sense	• Accept		
7	If SSO captured job title as grandfather	• Clear the job title and use N/A for grandfather, Accept		
8	If there is no grandfather name on ID and name captured by SSO make sense	• Accept		
9	If grandfather name on ID is blurry and not visible	• Use N/A for grandfather and Accept		
10	If full name on the ID is blurred and is not clear to read	• Use maximum effort and if it is not visible, Reject	• Blurry Scanned Document	
11	If SSO Captured title as first name. e.g Dr, Abebe	• Edit name as per the ID. If there is no grandfather, Use N/A for grand father		
12	If mandatory fields are hidden intentionally (using fluid and paper or folded and looks suspicious)	• Reject	• Mandatory field hidden	
13	If the issue date of ID (Except kebele ID) is edited.	• Reject	• Mandatory Field Edited by pen	

Stamp Related Rules.....

NO	Rejection Reason	SENARIO	Decision	Revised Business Rule
1	Stamp Related	Photo - Not Partially Stamped	Reject - If ID is Paper/Manual ID	Accept - If ID is Paper/Manual ID
		ID - Not Partially Stamped	Reject if Paper/Manual ID	Accept - If ID is Paper/Manual ID
		No - Stamp on ID	Reject if Paper/Manual ID	Reject if Paper/Manual ID
		Stamp - Not touching Photo	Reject if paper/Manual ID	Accept as long as there is a stamp on the ID regardless where (front/Back)
		Photo - Not Partially Stamped	Accept - If ID is Digital/Printed	
		ID - Not Partially Stamped	Accept If ID is Digital/Printed	
		No - Stamp on ID	Accept If ID is Digital/Printed	
		Stamp - Not touching Photo	Accept If ID is Digital/Printed	

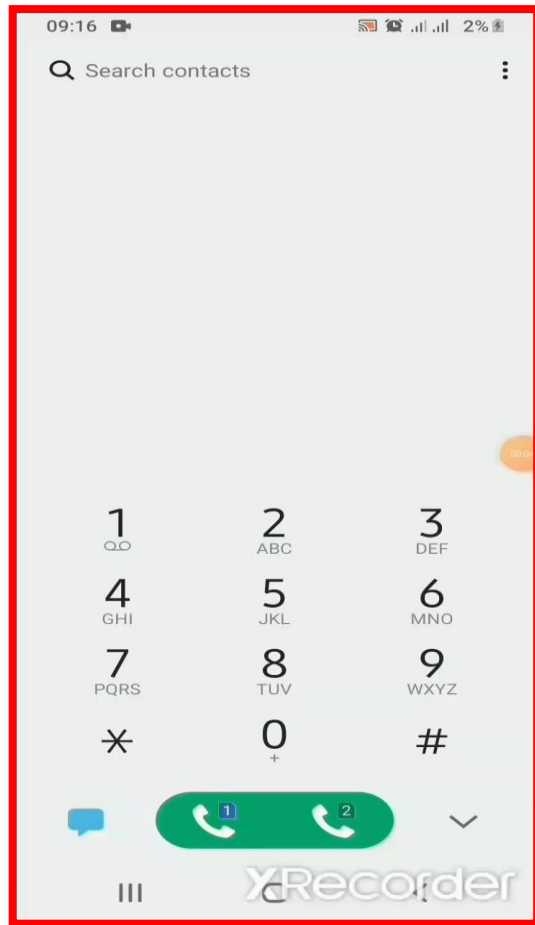

Stamp Related Rules....

NO	Rejection Reason	SENARIO	Decision
1	Stamp Related	Stamp don't match with authorized issuer of the ID	Reject
		Stamp on the ID or photo is not clearly discernible	Accept
		The partial stamp on the ID is not clearly visible but is clear on the photo	Accept
		A blurry stamp on the ID	Accept
		ID and photo on the ID display partial stamping, yet the document lacks complete stamp coverage	Accept
		If stamp on the ID and on the document is different, or in cases where the stamps originate from other institutions	Reject

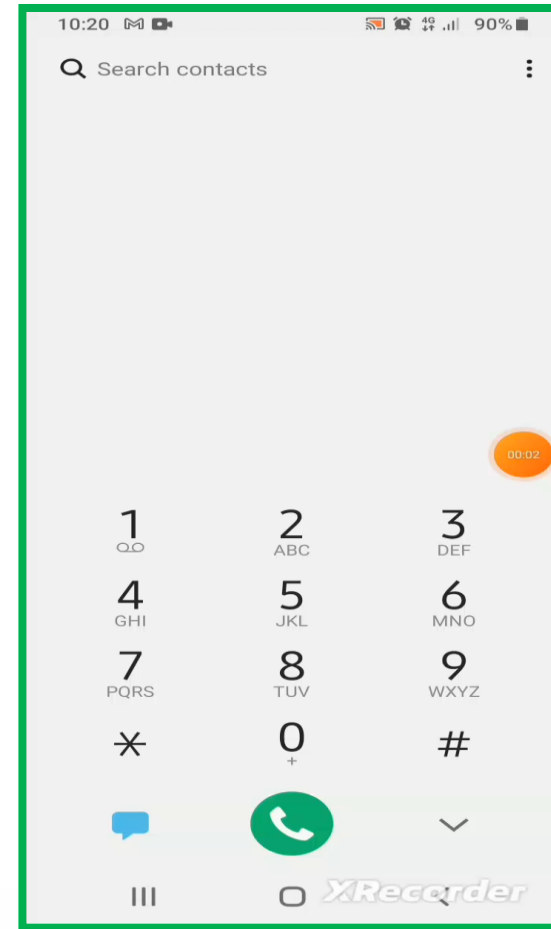

Activating Customer

Activation-Internet Setting Options-Demonstration

USSD Option

IVR Option

Activation-Internet Setting Options

Customers have four options for Internet (APN) configuration. The first option is automatic, which does not require any action from the customers. For example, when customers insert the Safaricom SIM into phones like the Kimem, APN will be configured by default. The steps for USSD, SMS, and manual configuration, as shown below.

USSD Option

1. Dial *777#
2. Select 'Internet & SMS' –
3. Select 'Getting Internet Settings'
4. Read the instruction you receive from 777
5. Go to the notification banner and install.

SMS Option

1. Send A via your SMS app to 700
2. Read the instruction you receive from 700
3. Go to the notification banner and install.

IVR Option

1. Call to 700
2. Press 3
3. Press 2
4. Read the instruction you receive from 777
5. Go to the notification banner and install.

Manual Option

For Android devices, depending on your phone type and android version:

1. Go to 'Settings' -> click on 'Internet & Mobile Networks' or 'Mobile Networks' or 'Connections' or More... or 'All Settings' or 'Advanced..' or SIM Cards' -> click on Access Points Name (APN)
2. Click on 'Add' or '+' and enter the below details:
Name: Safaricom
APN: Safaricom
3. Save and select the newly added APN and then switch on mobile data

For Apple devices, you can follow the below general steps:

1. Go to 'Settings' -> click on 'Cellular' -> 'Cellular Data Network' -> click on Access Points Names (APN)
2. Under Cellular Data, enter following detail:
APN: Safaricom
3. Settings will be saved, and service is ready for use

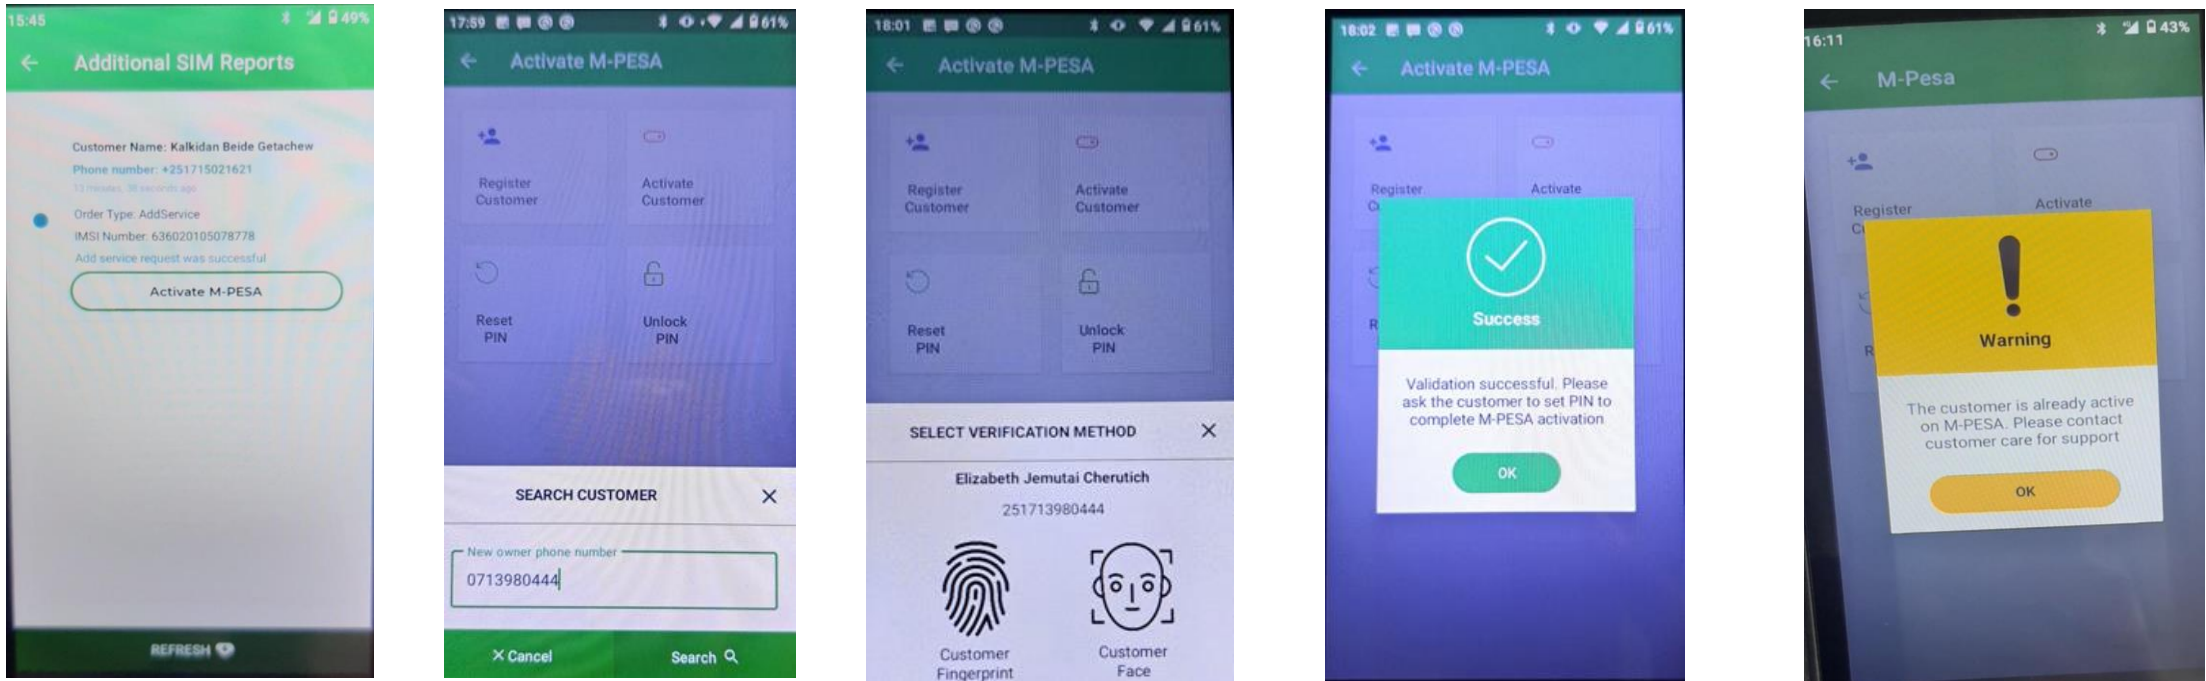

Consider SIM 1
when activating as
it always gives a
better experience
for the customer

Note: For Safaricom devices, to be able to use it you have to have Safaricom sim card inserted in sim slot 1.

Activating Customer on MPESA

Customer Onboarding-M-PESA Activation-Upon Customer Registration

Note:

- Activating up registration of customer (whether it is new or add) you can activate from report menu.
- Remember the SIM card must latch on the network at the moment of activation.
- With the new change OPT will not be asked. After searching the customer take fingerprint the eKYC system will verify if the customer already exists or not. Warning notification will pop up if the customer already exists.
- If not validation successful will pop up and the agent needs to ask the customer to set pin for activation to be complete & earn his/her commission **16 birr**.
